

# **SUNDIAL RECOMMENDED TREE LIST (Parker Tree Service)**

If they would like to replace their trees with a shade tree. I would suggest Kentucky Coffee or London Sycamore as my primary two suggestions. They will be the best choices for soil, wind, snow, aesthetics, etc...

If they are not concerned about faster growth, I'd suggest Greenshire Linden or White Oak.

If they want something smaller and ornamental (flowering) I'd suggest Red Bud, Snow White Crab Apple, or Cherry. (The first two, don't produce fruit).

These are the deciduous suggestions. If they want evergreen I'd suggest White Pine or Concolor Fir/White Fir. **BACK YARDS ONLY!**

Other suggestions: Red Spire, Aristocrat Pears, Shademaster, Skyline, Sunburst Honey Locust, Littleleaf, Glenleven, Greenspire, Redmond Lindens

Please do not plant maples trees as they will not make it with this soil.
