

Pre-approved Paint Colors

Please note, you may not use the same color as used on the house on either side of your home or directly across the street.

Wolf Creek Pre-Approved paint colors for Front Doors and Shutters. Original white painted trim should be painted the same white. The white paint used on trim is a "pure white" base color with no tint. Approval is required before painting any of the original white trim a color besides white. If you choose to use another brand please use the SHERWIN WILLIAMS color paint chip code for an exact match. The paint colors can be seen at the Flagstaff Management office during normal business hours. You are responsible for ensuring that you have purchased an exact match to the pre-approved color or the original color used by the builder. Check the color codes carefully.
